

Inquest into the death of Franky Houdini

Franky Houdini died on 2 June 2015 in his cell at the Wolston Correctional Centre. Mr Houdini hanged himself using a thin piece of nylon cord similar to that used on tennis court nets.

State Coroner Terry Ryan delivered his findings of inquest on 16 May 2018.

The Queensland Government responds to recommendations directed to government agencies at inquests by informing the community if a recommendation will be implemented or the reason why a recommendation is not supported.

The departments named in this response will provide implementation updates until the recommendation is delivered. Further information relating to the implementation of recommendations can be obtained from the responsible minister named in the response.

Recommendation 1

Noting that an existing working group is examining the memorandum of understanding (MOU) and operating guidelines, I recommend Queensland Health and Queensland Corrective Services consider whether amendments are required to legislation to supplement the release of information (including documents) under the MOU on confidential information disclosure to optimise the health care provided to persons in custody; and protect health practitioners from liability when sharing prisoner health information appropriately.

Response and action: the recommendation is implemented.

Responsible agency: Queensland Health (lead) supported by Queensland Corrective Services.

On 25 October 2018 the Minister for Health and Minister for Ambulance Services and the Minister for Police and Minister for Corrective Services responded:

The ministers acknowledge the recommendations from the investigation are for both Queensland Health and Queensland Corrective Services and that Queensland Health is leading the work.

Queensland Health and Queensland Corrective will work together to consider the coroner's recommendation.

On 2 June 2019 the Minister for Health and Minister for Ambulance Services responded:

Queensland Health and Queensland Corrective Services established the information sharing and operational practice working group. The working group found current legislation does not prohibit staff in either agency from sharing relevant confidential information.

The working group will focus on enhancing working relationships through strengthening the memorandum of understanding (MOU) for confidential information disclosure. The operational guidelines will be updated to support the MOU to provide more detailed guidance on sharing relevant confidential information between the agencies.

The new version of the MOU concisely describes the cooperative working relationship between the two departments when sharing confidential information to enable both agencies to undertake their respective roles and responsibilities to provide client focused health services to shared clients.

The MOU will be prescribed in the Hospital and Health Boards Regulation 2012.

Recommendation 2

Noting that an existing working group is examining the memorandum of understanding (MOU) and operating guidelines, I recommend Queensland Health and Queensland Corrective Services consider amendments to the operating guidelines under the MOU on confidential information disclosure to provide more relevant contextual information in relation to the sharing of information in correctional settings.

Response and action: the recommendation is implemented.

Responsible agency: Queensland Health (lead) supported by Queensland Corrective Services.

On 25 October 2018 the Minister for Health and Minister for Ambulance Services and the Minister for Police and Minister for Corrective Services responded:

The ministers acknowledge the recommendations from the investigation are for both Queensland Health and Queensland Corrective Services and that Queensland Health is leading the work.

Queensland Health and Queensland Corrective will work together to consider the coroner's recommendation.

On 7 May 2019 the Minister for Health and Ambulance Services and the Minister for Police and Minister for Corrective Services responded:

Queensland Health and Queensland Corrective Services established the information sharing and operational practice working group. The operational guidelines will support the memorandum of understanding (MOU) for confidential information disclosure to provide more detailed contextual guidance for sharing relevant confidential information between the agencies.

The scenarios in the current MOU were removed and will be presented in the supporting operational guidelines. Providing the scenarios in the operational guidelines allows for more detailed contextual guidance information to be presented and for information to be more easily amended, allowing key guidance material to be updated quickly, responding to any change in practice and agreed protocols for shared clients.

The working group is reviewing the operational guidelines to ensure the guidance provided to staff is easy to understand and information sharing protocols are contextual.

On 11 December 2019 the Minister for Health and Ambulance Services and the Minister for Police and Minister for Corrective Services responded:

The working group agreed to enhance working relationships through strengthening the existing Queensland Health and Queensland Corrective Service's MOU for confidential information disclosure.

The MOU is being redrafted to broaden the provisions for relevant confidential information disclosure. When this has been finalised, the supporting operating guidelines will be revised to provide more detailed guidance on sharing relevant confidential information between the agencies.

The MOU and guidelines will be published on the Queensland Health [website](#).
